

Internet: IP Transit & Internet Access services

Optimise your Internet connection with our high-capacity services available from multiple locations worldwide

RETN Internet services enable you to get carrier-grade dedicated access to the Global Internet from large number of locations worldwide via a single autonomous system, AS9002. We offer a fast and reliable connectivity solution based on the Global RETN IP network which is directly connected to the biggest international networks worldwide. This allows us to deliver excellent service performance and reliability to our customers in different parts of the world. Wherever you are based and whatever your business is, we can tailor our services and provide high availability to meet your specific needs for access to the Internet.

Standard Service Features

- **Extensive IP network** built over own high-capacity DWDM system
- **Service available at over 250 on-net PoPs worldwide** and can be extended to any off-net location
