

# Remote IX: remote peering services

**Become a member  
of the world's leading  
International Exchange  
Platforms: hassle-  
free and with minimal  
capital outlay**

**RETN Remote IX service** enables you to remotely access a broad network of geographically diverse peers from any RETN PoP via Ethernet (EPL) connections. Due to reseller agreements with major Internet Exchange Platforms (IXPs) in Europe and beyond, we provide seamless and reliable access to these IXPs using the RETN MPLS network infrastructure. We take care of all the management and control of the connection, so that you can simply enjoy peering with local and international members from any location where it is the most convenient to you.

**RETN offers remote connection worldwide to several Internet Exchange Platforms:**

## RETN Remote IX service to facilitate your peering relationships at a distance:

- **Extend your peering connections safely and securely** using the RETN large-scale network and other networks peering at IXPs
- **Optimise your connectivity benefiting from our professional expertise** in maintaining and controlling the connections with multiple IXPs
- **Interact with one party to rule all:** contract, service set up and management
- **Optimise your costs** of purchasing, installation and maintenance of the service
- **Benefit from a multi service port** allowing single access to multiple IXPs and RETN services on one port
- **Get your service when you need it: fast, efficient** delivery of services
- **Contact technical support 24/7** via phone, email, Customer Portal
- **Stay informed** with Customer Portal containing a real-time inventory of live services along with invoices, escalation matrix or trouble tickets

**We can arrange your international peering at various Internet Exchange Platforms. Direct, secure, easy, fast.**
